About Anthony

Anthony Keers' most relevant expertise is in underground mine planning and scheduling, having spent 4 years with Sons of Gwalia. His second love is software, sojourning across to Vancouver in 2006 to join the Gemcom Software Team.

Recently branching into open cut mine optimisation, design and life of mine scheduling, Anthony's projects have been varied both in commodity types and locations around the world, forming a solid base of knowledge to draw from in regards to Reserve Estimation.

Naturally, Anthony has a high level of knowledge in the complex use of Surpac and Whittle aided by his previous employment with Gemcom Software.

Consulting Task History

Barrick Gold Varying Levels of Mining Studies, Underground and Open Pit

About Auralia

Auralia Mining Consulting has a policy of close client liaison; there's no red tape, and no middle men. Every consultant works one-on-one with you, our valued client. Each consultant has the necessary skills and experience to ensure the work is carried out not only to a high standard, but also has the flexibility to match your changing specifications and needs.

Auralia Mining Consulting covers all aspects of mining engineering and our consultants have the relevant competencies and prior experience to perform and sign off all work according to the Australian JORC Code and Canadian Article NI43-101.

Auralia Mining Consulting is here to work for you. Our team of skilled consultants will be able to guide you through and provide you with the assistance you need on everything from first pass optimizations right through to Bankable Feasibility studies and stock exchange technical mining engineering releases.

We'll be there with you, working for you, every step of the way.
