

Roselt Croeser
Non-Executive Director

Education

M.Sc (Mining Engineering) (University of Witwatersrand)
B.Sc (Mining Engineering) (University of Witwatersrand)

Relevant Qualifications

Quarry Managers Certificate (Western Australia)

Professional Societies

Member, Australasian Institute of Mining and Metallurgy

Relevant Employment Record

Consulting Mining Engineer, Various (2000-2010)
Production Superintendent, KCGM (1996-2000)
Open Pit Superintendent/Resident Manager, Newcrest Mining (1994-1996)
Mine Planning Engineer, Newcrest Mining (1992-1994)
Mine Planning Engineer, Phelps Dodge Mining Co. (1988-1990)
Research Officer, University of Witwatersrand (1985-1988)

Publications

Whittle Optimisation at the Telfer Gold Mine Today (R.W Croeser, Whittle Conference, 1995)

Production Statistics From Real Time Capture to Information (R.W Croeser, Conference on the Application of Computers in the Minerals Industry, 1993)

Effects of the Extraction of Tabular Deposits Around Vertical Shafts in Deep Level Mines (S. Budavari & R.W Croeser, 6th International Congress on Rock Mechanics, 1987)

GMP Skills

Whittle (Expert)

Datamine (Advanced)

Minemax (Advanced)

Surpac (Intermediate)

About Roselt

Roselt joined Auralia Mining Consulting as a Non-Executive Director in 2010, adding 18 years of combined Australasian onsite and consulting experience to the team. His operational commodity experience includes coal, nickel and gold, and he has covered PGM's, gold, iron ore, nickel, diamonds, tin, mineral sands, uranium and lithium since moving into the realm of consulting in 2000.

Roselt's career began in his home country of South Africa, where he first worked on coal mines whilst attaining his BSc Mining Engineering at Witwatersrand University. Upon completion of his degree, Roselt spent time lecturing in mathematics and working as a research officer whilst completing study in his Masters of Engineering, also at Witwatersrand University.

After a two year stint working as Mine Planning Engineer in Botswana, Roselt moved to Western Australia and spent 4 years working for Newcrest, followed by another 4 years working for KCGM in senior engineering and management roles.

Roselt then spent the last 10 years working in the realm of mining consulting, both for himself and for reputable major consulting houses. He has covered the full gamut of mining engineering consulting services, from being responsible for all facets involved in the planning of open pit mines of all scales and commodities, to training personnel and clients, to full audits and mine reviews.

If you'd like to have Roselt help you with your project, please contact him as per the details displayed below.
